DIN Rail Power Supply

NT 22.5

CE

WEIGEL

Application

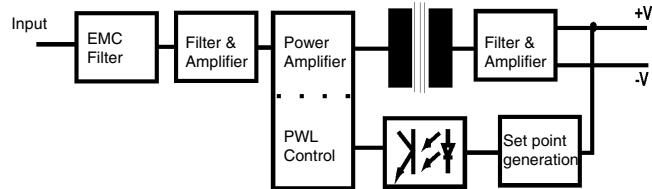

The NT 22.5 power supply can be used for multiple applications and can be supplied with various output voltages (5 V, 12 V, 15 V, 24 V). It is overload- and overtemperature-proof and has a function indication. The power supply is **permanently overload-, short-circuit-and over-temperature-proof**.

A green LED lights up if the output voltage is available.

The power supplies comply with safety requirements and are tested for interference immunity.

The power supplies are designed to be mounted in machines/systems. Regulations for installation of electrical systems and equipment have to be observed.
